

BART DORITY

AI Native UI Engineer | Interactive Experiences | AI-Powered Products | Design Systems

San Francisco, CA | jobs4bart@gmail.com | (415) 503-7044

Portfolio: [bartdoryportfolio.online](#) | GitHub: github.com/b0rgbart3 | LinkedIn: linkedin.com/in/bart-dority

Summary

AI-Native UI Engineer specializing in the design and development of modern, interactive web applications. Combines deep expertise in React, TypeScript, and front-end architecture with a background in graphic design, branding, and animation to create intuitive, visually polished user experiences.

Experienced delivering complex, data-driven interfaces for enterprise applications while leveraging AI-assisted development to improve productivity, accelerate iteration, and maintain high-quality code. Particularly motivated by building creative, user-centered interfaces for AI-powered products, visualization tools, and interactive web experiences. Passionate about creating engaging user experiences for AI-powered products, interactive visualizations, and data-rich web applications.

Skills

UI Engineering & Interactive Experiences

React, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3, Sass, Material UI, Responsive Design, Accessibility (WCAG), State Management (MobX), Component Architecture, Design Systems, Interactive UI Development

AI Development

Claude Code, ChatGPT, Gemini, LangChain, LangGraph, custom agentic workflows, RAG, Embeddings, Prompt Engineering

Design & Visual Communication

Adobe Creative Suite, Figma, UI Design, Interaction Design, Visual Design, Brand Identity, Wireframing, Rapid Prototyping

API Integration

REST APIs, Node.js, Express, Python, FastAPI

Visualization & Graphics

SVG, Canvas API, CSS Animation, Framer Motion, GSAP, Responsive Graphics, Interactive Data Visualization, React Flow, D3.js (Learning), Three.js (Learning)

Development Tools

Git, GitHub, GitLab, VS Code, npm, yarn, Jenkins, Jira, AWS, Heroku

Databases

MongoDB, PostgreSQL, MySQL

Testing

Jest, React Testing

Additional Technologies

Flutter, Dart, Angular, Swift, Objective-C, Java, Ruby on Rails

Experience

UI Engineer

Grid Dynamics, San Francisco CA.....**May 2021 - Jan 2026**

- Designed and developed information-rich, data-driven user interfaces for an enterprise fintech platform, transforming complex financial workflows into intuitive, responsive experiences used by clients managing hundreds of accounts.
- Architected scalable front-end applications using React, TypeScript, Material UI, Sass, and MobX, creating reusable component patterns that balanced maintainability, performance, and exceptional user experience.
- Built interactive interfaces by integrating REST APIs and asynchronous services, enabling responsive, real-time interactions with complex datasets while optimizing application performance and reliability.
- Collaborated closely with product managers and UX designers to translate complex business requirements into polished, accessible, and visually consistent user experiences.
- Advocated for thoughtful interaction design, visual refinement, and consistent user experiences across new features, helping create interfaces that balanced usability, performance, and maintainability.
- Leveraged AI-assisted development tools to accelerate implementation, rapidly prototype solutions, improve development efficiency, and streamline debugging and code refinement.
- Contributed to front-end architecture, reusable design patterns, and long-term evolution of a large-scale enterprise application, with a focus on interface craftsmanship, scalability, and maintainable code.

Freelance Web Developer / UI Engineer

Dority Design Works, San Francisco, CA.....**2005–2021**

- Designed and built responsive, user-centered web applications and interactive digital experiences for clients across public media, advertising, arts, publishing, nonprofit, and creative industries, translating complex content and brand goals into clear, polished, production-ready interfaces.
- Developed custom database-backed websites, content workflows, and admin tools using JavaScript, PHP, MySQL, HTML, CSS, AWS, and Heroku, with an emphasis on maintainable front-end implementation and practical full-stack delivery.
- Created visual and information-rich interfaces for portfolios, publishing workflows, image catalogs, and client-managed content systems, strengthening skills in responsive layout, visual hierarchy, interaction design, and structured data presentation.
- Partnered directly with clients, designers, writers, artists, and creative teams to clarify requirements, prototype solutions, iterate on UX details, and deliver web experiences aligned with user needs and business objectives.
- Applied a design-trained engineering approach to typography, layout, animation, responsive graphics, and visual refinement, producing interfaces that balanced usability, performance, maintainability, and brand consistency.
- Earned a Silver Caddy Award for Creative Excellence for the Jeep Liberty website, recognizing strengths in visual design, interaction, and front-end execution.
- Built long-term client relationships with organizations and collaborators including KQED, Doremus Advertising, Organic Inc., SF Long-Term Care Coordinating Council, artists, and authors in the U.S. and internationally.

Education & Training

AI Accelerator Program for Engineers - Outskill.com 2026

Certificate, Generative AI Mastermind - Outskill.com, 2025

Certificate, Full Stack Web Development – UC Berkeley Extension, 2019

Certificate, iPhone Programming – City College of San Francisco, 2016

BFA, Computer Graphics – Pratt Institute, Brooklyn, NY

Projects

MoonMath Data Tools — Full-Stack Publishing App + Interactive Financial Dashboards

<https://moon-math.online/>

Full-stack publishing platform with interactive financial tools, including a Bitcoin Retirement Calculator, reusable Bitcoin Widgets package, and SimpleCAGR dashboard. Built with React, Node.js, custom Sass, Mongoose, and MongoDB, with an emphasis on responsive UI, structured data presentation, calculator interfaces, and dashboard-style user experiences.

Google Bookshelf — API-Driven Collection Management App

<https://googlebooks.bartdority.online/>

Responsive full-stack MERN application allowing users to search, save, and manage book collections using the Google Books API. Built with React, TypeScript, Node.js, Express, and MongoDB, featuring RESTful APIs, external API integration, saved collection workflows, and responsive front-end implementation.

LightBurst — Cross-Platform Interactive Graphics App

<https://lightburst-app.online/> - Interactive graphical puzzle game originally built for iPhone and iPad in Objective-C and later rebuilt with Flutter and Dart for iOS, Android, and web. Demonstrates cross-platform development, visual interaction design, animation, mobile UI implementation, and product ownership from concept through release.

Jerry Frost — Custom Portfolio + Admin Workflow for Visual Artist

<https://jerryfrost.com/> - Mobile-first responsive portfolio application with an image catalog and custom admin dashboard for uploading, categorizing, and sorting artwork. Built with PHP, JavaScript, HTML5, and CSS3, emphasizing visual presentation, client-managed content workflows, and lightweight maintainable architecture.

Selected Freelance Client Work

Additional live client websites include Amy Graham, Willow Kelly, and Dority Design Works, representing long-term freelance ownership, responsive web delivery, hosting management, visual design, and client-facing production support.
